

Mae Fah Luang University

School of Applied Digital Technology

Digital and Communication Engineering

Bachelor of Engineering Programme in Digital and Communication Engineering Programme

Degree Academic Programme**Length of Programme**

B.Eng. Digital and Communication Engineering 4 Years

Programme's Philosophy

At present, the knowledge of digital communication engineering is essential for industrial operations to develop the economy under the rapid changes in information technology such as, the Internet of Things that can be found in the various devices, the data processing to obtain information, the information cyber security systems and the information and communication systems. All of which contribute to the implementation of the modern lifestyle and economy.

As mentioned above, people who play a key role in these developments are in great demand from the business sector. Due to the lack of personnel who have special and specific knowledge and skills.

For this reason, the Bachelor of Engineering program in Digital Communication Engineering of School of Information Technology, Mae Fah Luang University have seen the needs of the business sector and the importance of this knowledge. Therefore, the curriculum has been improved by focusing on producing graduates in digital communication engineering who are real knowledgeable people. Pragmatists can actually work internationally with their specialized knowledge in use, application, design, build, maintenance

and further development with knowledge of the Internet of Things, the information processing, the information and cyber security. By focusing on creating knowledge that requires a combination of many technologies together to support the provision of information services under the new age of information technology including comprising morals and professional ethics which will contribute to the sustainable development of the country.

Programme's Objectives

This program trains our undergraduates to have digital engineering and computer communication knowledge and skills in terms of academic and practical skills with international standards. In addition, our students will specialize in digital engineering and computer communication designing and developing with entrepreneurship mindsets.

Moreover, our students can apply engineering skills to create engineering value under academic ethics for the industrial labor markets.

Career Opportunities

1. Information and communication engineer
2. Digital technology engineer
3. Electronics and IoT engineer
4. Cyber security engineer
5. Government officer and state officer, state enterprise employees, private organizations

Programme Learning Outcomes: PLOs

- PLO1: Discipline, respect the rules of the organization and society, volunteer for the community, academic ethics in digital engineering and communication
- PLO2: Explain the principles and theories of data processing, information security, information system security, Information communication, and information communication system and other related sciences that keep up with technology changes

and modern digital engineering and communications, and have the idea of being an entrepreneur

- PLO3: Design a system or innovation by integrating knowledge of digital engineering and communications with user requirement and other related sciences to solve digital engineering and communication problems
- PLO4: Able to work in teams with multidisciplinary teams under a multicultural society
- PLO5: Can analyze numerical data, applying modern digital engineering and communication technologies in practical work and academic communication to meet the needs of users
- PLO6: Create and develop systems in digital engineering and communication that respond to the industrial labor market.

Tuition and Fees

- 36,400 Baht per semester
- 291,200 Baht per programme

Programme Structure

- Bachelor of Engineering Program in Digital and Communication Engineering

1. General Education Course 30 credits

2. Specific Requirement Course 96 credits

2.1 Foundation Course 30 credit

2.2 Major Required Course 54 credits

2.3 Major Elective Course 12 credits

3. Free Elective Course 6 credits

Total credits : 132 credits (4-year Bachelor's Degree)

(Refer to Bachelor of Engineering Program in Digital and Communication Engineering Year 2022)
